Information on Theoretical Education and Clinical Training:

- Theoretical education is prepared as a hybrid. Follow the course list to be announced, whether the courses are conducted through the O'Learn system or face-to-face.
- To be considered successful in the periodontology course, the average of the determined percentages of the Quiz, Midterm and Final Exams must be at least 60.
Quiz :%15
Mid-term Exams :%35
Final Exam : %50 effect on success score.
- Within the scope of Clinical Training, 3rd-year students are required to make clinical measurements and polishing of 1 patient. Students who do not complete the clinical score threshold will not be able to take the final exam.
- Periodontology Department term supervisor of 3th grades is Assist. Prof. Ekin Beşiroğlu Turgut. You can contact ekin.besiroglu@okan.edu.tr for your questions and support.
