

Sustainability and Social Impact Rankings

Sustainability and social impact rankings are specialized ranking systems that measure universities' performance in environmental, social, and governance (ESG) areas and evaluate their impact on society. These rankings focus not only on universities' academic achievements but also on their contributions to society, eco-friendly policies, and alignment with sustainable development goals.

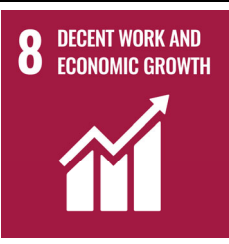

Importance of Sustainability and Social Impact Rankings

While traditional academic rankings usually emphasize indicators like research quality and teaching performance, sustainability and social impact rankings offer a broader perspective. These rankings consider higher education institutions' alignment with:

1. Sustainable Development Goals (SDGs),
2. Strategies to reduce environmental impact and carbon footprint,
3. Social equity and responsibility projects,
4. Community engagement and contributions to local development.

These rankings showcase universities not only as academic leaders but also as global leaders in social responsibility and sustainable development.
